## II. Definitions and Terms

6. "Thai Stud Book" is the organization which, under the directions of the Stud Book Authority of Thailand, carries out the registration of breeding stock and foals of racehorses whereby, separate registers for these horses are kept as follows:-
- 6.1) "**Thai Stud Book**" - for horses registered as thoroughbred with Thai Stud Book.
  - 6.2) "**Non-Thoroughbred Register**" - for non-thoroughbred horses or horses of other breeds or horses lacking the qualifications for thoroughbreds set by the stud book.
7. "Thai Stud Book" also means the book or publication with compiled reports of foaling or covering results within the past four years of all thoroughbred mares at stud in Thailand.
8. A "horse" means and includes a racehorse, stallion, gelding, mare, yearling, weanling and a foal within the meaning of these rules.
9. A horse is "bred" at the place of its birth.
10. A "breeder" is the person, group of persons, or a legal entity (including a company, partnership, etc.) that owns or is the lessee of the dam when the foal dropped.
11. An "owner" is the person in whose name the horse stands registered at the point of registration application or as revised in the records of the Stud Book Authority of Thailand.
12. A "person" means and includes any person, individual, company or other legal entity.
13. A "Thoroughbred" is, in accordance to Article 12 of the International Agreement on Breeding and Racing, a horse which must satisfy the following qualifications:-
- 13.1) It is the product of a mating between a sire and a dam both registered prior to 1st January 1980, by a Stud Book approved by the International Stud Book Committee or must trace in all lines of its pedigree to horses so registered.
  - or**
  - 13.2) It can be proven satisfactorily that the horse is a product out of eight recorded consecutive crosses with horses in the category described in No.13.1 above, including the cross of which it is the progeny.
  - 13.3) Notwithstanding that a horse may qualify under No.13.1, the Stud Book Authority of Thailand may have the right to refuse a recording in its stud book, any horse which fails to satisfactorily prove eight recorded consecutive crosses with horses described in No.13.1 or No.13.2 (including the cross of which it is the progeny) but such refusal shall not be effective unless it is confirmed by the unanimous decision of International Stud Book Committee.
14. A "Non-Thoroughbred" is a horse of a breed other than thoroughbred or a horse whose properties (or documentation) does not meet the qualifications for a thoroughbred.
15. A "Thoroughbred Cross" is the product from a mating in which one or the other partner is universally eligible for inclusion in a stud book (is a thoroughbred).
16. "Parentage Validation" is the validation of a foal's parentage by comparing the bloodtype profile of the foal with the bloodtype profiles of its sire and dam. If the parentage validation results show exclusion, the horse's provisional registration will be immediately revoked and such horse cannot be registered under Thai Stud Book's system; unless the owner proposes a possible change in the pedigree and it can be proven that the parentage validation of the foal-in-question shows inclusion.

### III. Rules and Regulations

#### Eligibility

17. The Thai Stud Book and the Non-Thoroughbred Register shall contain official parentage pedigree and identification records of all racehorse foals born in Thailand. Under the Rules of Racing, only horses born in Thailand that have been accepted into the Thai Stud Book or the Non-Thoroughbred Register are eligible to register for racing.

18. Thai Stud Book will separate horses upon registration into either the thoroughbred or non-thoroughbred category. Only horses meeting the qualifications of a thoroughbred as described in No.13 of Definition and Terms will be admitted to the Thai Stud Book.

19. Horses entered as foals in the Non-Thoroughbred Register are eligible for promotion to the "Thoroughbred" status if it can be proven that, the horse is a product of eight verified and recorded consecutive thoroughbred crosses including the cross of which it is a progeny, and, it can show a record of high standard in racing performance. Such promotions shall be approved by the unanimous agreement of the International Stud Book Committee.

20. All horses must be accurately identified before being accepted into Thai Stud Book's official records. Identification process includes the recording of natural visible features such as color, whorls, markings and other acquired markings such as brands or tattoos, and, the horse's age and bloodtype profile. Imported horses are considered officially registered when their identification have been checked against, and found to match, the details on the official stud book certificate from the stud book authority of its country of birth.

21. To become eligible for acceptance into Thai Stud Book's official records, all foals born in Thailand must be parentage validated whereby a foal's bloodtype profile is matched against its sire and dam's bloodtype profiles and the result must show inclusion.

22. To be registered as stallions or broodmares by Thai Stud Book, horses must be re-tested for bloodtype profile and have the recent profile matched against the profile from when they were registered as foals. This rule also applies for imported stallions and broodmares.

23. For foals to become eligible for acceptance in the Thai Stud Book or Non-Thoroughbred Register, the following official documents must already be submitted with Thai Stud Book:-

- (i) **Covering Certificate** – an official Thai Stud Book document to be used by the owner of a stallion to confirm its covering(s) whereas the white copy is to be given to the owner of the broodmare, the pink copy is to be sent to Thai Stud Book, and the blue copy is to be kept by the stallion owner for reference.
- (ii) **Mare Return Form** - an official Thai Stud Book document to be lodged annually with Thai Stud Book by the owner of broodmares to declare each mare's status in the past year, such as, whether the mare was used for covering or not, and if so, the outcome of that covering.

A mare is said to be "returned" to the Stud Book when her Mare Return form for that year is submitted. From 1st January 1998, mares that have not returned for two consecutive years will be struck-off from Thai Stud Book and to be re-admitted into Thai Stud Book would mean going through the same registration procedures and fees as a new broodmare.

24. To be eligible for acceptance and recording in the Thai Stud Book, a foal must be:-
- (i) A product of natural service or covering which is the physical mounting of a mare by a stallion. **Artificial insemination is prohibited.**
  - (ii) A natural gestation took place in and the delivery is from the body of the same mare that conceived the foal. **Embryo transfer is prohibited.**

## Naming

62. A race horse's name is registered at the time it applies for speed test (time trial). The proposed name is filled in the application form to be submitted to the Central Registration Office and will become official on the day of the speed test when it is identified and branded. A horse is fully registered for racing upon passing the speed test.
63. Owners wishing to change a horse's name from the previously proposed name on the speed test application form must notify the Central Registration Office as soon as possible and notification must be made before the day of the horse's first speed test when it is to be identified and branded. Any changes of names after that, the owner is subject to pay a fee of Baht 10,000 per change.
64. The Racehorse Registrar is in charge of approving the proposed names for race horses.
65. Names of unraced horses to be registered as stallions or broodmares are approved by Thai Stud Book upon application whereby in such cases, the same Rules on Naming as used for race horses are also applied.
66. Under no circumstances can names of stallions or broodmares be changed.

70. A passport or document of description is issued to owners for identification purposes and pedigree details of the horse and must accompany the horse at all times for use as reference when the horse is covered, transferred or exported. Passports must be sent to Thai Stud Book for endorsement in cases of change in ownership or change of status from racing to breeding or vice versa.

76. A foal's bloodtype is matched against the bloodtypes of its sire and dam as a method of parentage validation. If the foal was conceived abroad, Thai Stud Book will coordinate with the appropriate stud book authority to obtain the bloodtype of its sire at stud overseas.

77. Under no circumstances shall horses that have not been bloodtyped be accepted for racing registration.

78. When a foal is excluded from its reported parentage, following procedures are taken:-

- (i) Withhold the horse's registration and inform concerned authorities.
- (ii) Notify the breeder/owner and ask for suggested alternative parentage.
- (iii) If the reported parentage stands, a second set of blood samples from the foal, its dam and, if necessary, its sire are collected and sent to the bloodtyping lab.
- (iv) In case of changes of parents from the reported parentage, a letter of confirmation with an explanation for the change from the breeder/owner is to be submitted.
- (v) If the result of the foal's second test still shows exclusion to its reported parentage, the foal's registration is to be terminated and it is excluded from Thai Stud Book.

79. Bloodtyping fee is Baht 1,000 per horse. In cases where second tests are required, the breeders/owners are responsible for the payment of such fees, and, if the second test results showed inclusion according to the initial reported parentage, these fees are to be refunded.

This laboratory is recognized by the International Society of Animal Genetics (ISAG) whereby the laboratory must undergo ISAG's regular comparison tests.

#### **Microchip**

81. As part of Thai Stud Book's registration procedures, all foals to be registered shall be implanted with microchips at the time of their identification and blood sample collection by panel veterinarians. The fee for microchip implantation is Baht 300 per horse.

82. In case an implanted microchip should deteriorate or become faulty (not responding well to the reader), re-implantation of a new microchip will be immediately carried out at Thai Stud Book's expense.

83. All horses to be re-implanted with microchips are subject to thorough identification which involves the inspection of the horse's physical appearance including the checking of age, sex, color, markings and whorls. Any discrepancies in identification from the original stud book certificate will lead to the proving of the horse's identity by means of bloodtype comparison and in such case, the horse's blood sample will be collected after the re-implantation process.

84. Racehorses coming to the racecourse for the first time for speed tests (time trials) must go through thorough identification inspection which also includes microchip reading. Once a horse is registered for racing and is given a race brand, microchip reading will, on race days, play a major role in the identification process.

85. Thai Stud Book will implant microchips in Thai-born horses only. Imported stallions and broodmares are not subject to microchip implantation.

#### **Color Coat and Genetic Laws**

86. Thai Stud Book strictly adheres to two coat-color inheritance principles for thoroughbreds of which, in all cases, state that:-

(i) The breeding of a chestnut sire and a chestnut dam must always produce a chestnut-colored foal. (This does not, however, imply that all chestnut foals must come from chestnut-colored parents.)

(ii) A grey foal must always come from at least one grey parent.

87. Bay stallions with records of producing all bay-colored foals from 12 chestnut mares or more per year will be categorized as a "Dominant Bay" stallions. If later on in life, it should occur that a recognized dominant bay stallion came to produce a chestnut-colored foal out of a covering with a chestnut mare then this stallion will no longer be categorized as a dominant bay.

#### **IV. Prohibition of AI and ET**

88. At **no time** will Thai Stud book accept the registration of foals conceived by any forms of breeding methods of Artificial Insemination (A.I.) or Embryo Transfer (E.T.). Therefore, if a foal is to be accepted for registration, it must be the product of a natural service or covering which is the physical mounting of a mare by a stallion, and, its delivery is directly from the same body of the mare that had conceived it.
